Lo Pro Dry Prairie Grass Mix

Native species per mix **10**
 Seeds per square foot **63**
 Native FQI NE Illinois **17.39**
 Native FQI Illinois **17.08**
 Native Mean C Value NE Illinois **5.50**
 Native Mean C Value Illinois **5.40**
 Mean W Value NE Illinois **4.10**
 Mean W Value Illinois **3.40**

A grass and sedge mix for excessively drained dune sands, gravelly glacial hills (kames), or well-drained thin soils over sandstone or dolomite. A short mix with a few tall grasses. Spring plant.

Graminoids, or grasses, sedges, rushes, and other grasslike plants.

- Yellow is uncertain data

OBL = -5, FACW+ = -4, FACW = -3, FACW- = -2, FAC+ = -1, FAC = 0, FAC- = 1, FACU+ = 2, FACU = 3, FACU- = 4, UPL = 5.

Graminoids include *Graminae* (grasses), *Cyperaceae* (sedges), *Juncaceae* (rushes), *Sparganaceae* (burreeds), and *Acoraceae* (sweetflag). Forbs are herbs and select shrubs, which typically behave as herbaceous in a fire managed context, both having more or less showy flowers.

New and old scientific names are relative terms. Many 'new' names are actually names that were in use 80 to 100 years ago, but were replaced by the names with which we have become accustomed. New is used in the sense that the names have recently come into use or will be soon in Illinois.
