Graminoids include Graminae (grasses), Cyperaceae (sedges), Juncaceae (rushes), Sparganiaceae (burdeeds), and Acrocaraceae (sweetflag). Forbs are herbs and select shrubs, which typically behave as herbaceous in a fire managed context, both having more or less showy flowers.

New and old scientific names are relative terms. Many 'new' names are actually names that were in use 80 to 100 years ago, but were replaced by the names with which we have become accustomed. New is used in the sense that the names have recently come into use or will be soon in Illinois.

Summary table with 4 rows: Forb totals (seeds/oz, seeds/lb, lb/ac, seeds/acre, seeds/ftsq, % by weight, % by count), Graminoid forb totals, and Grand total.
