Stand alone shorter grass & sedge mix for average to rich soils. Depending on soil richness & age of the stand, thigh to waist high. If you can see over it in September, it's short prairie. Spring plant. Guaranteed not to rust, bust or bite the baby!

Graminoids, or grasses, sedges, rushes, and other grasslike plants.

Graminoids include *Graminae* (grasses), *Cyperaceae* (sedges), *Juncaceae* (rushes), *Sparganaceae* (burreeds), and *Acoraceae* (sweetflag). Forbs are herbs and select shrubs, which typically behave as herbaceous in a fire managed context, both having more or less showy flowers.

New and old scientific names are relative terms. Many 'new' names are actually names that were in use 80 to 100 years ago, but were replaced by the names with which we have become accustomed. New is used in the sense that the names have recently come into use or will be soon in Illinois.
